CONGRATULATIONS to AWARD WINNERS

More details about the requirements for reimbursement would be mailed to the candidates soon.

About the Fellowship:

The Electron Microscope Society of India (EMSI), in an effort to encourage young students, constituted a fellowship to help Ph.D. students and Postdoc Students, who are also Life Members of EMSI in the form of partial financial support (started in the year 2017). The successful candidates expected to be participating in an International Conference, usually organized by IFSM associated societies. The fund is raised from the “Sustaining Members of EMSI”. We thank M/S Thermo Fisher Scientific and M/S Jeol India limited for their special contributions towards “Sustaining Membership” besides M/S EDAX/Ametek, M/S Icon Analytical, M/S Mcube, M/S Oxford Instruments, M/S Technos Instruments and M/S Zeiss India. Usually two fellowships are given every year. However, as this year is an IMC event (IMC19), the EMSI is delighted to award four (4) such fellowships to Ph.D. students/Postdoctoral fellows and one fellowship to the Office bearers (who represent EMSI).
